PROFESSIONAL SUMMARY

Software Engineer with 3 years on DraftKings' iGaming casino platforms across 7 regulated US and Canadian markets; promoted twice and commended by DraftKings engineering management for the Golden Nugget launch. Ran game integrations from planning to production as sole contact for 20+ vendors, scaling from ~150 to 500+ game per sprint with Python automation; refactored a legacy Django tool used by 1,000+ staff and shipped .NET/C# and SQL payment services with zero rollbacks. First Class Honours M.Sc. in Data Analytics. Dublin-based and available immediately.

KEY SKILLS

Languages & Frameworks: Python, C#, .NET, Xamarin, Django, SQL (MySQL), R
Cloud & DevOps: Azure Pipelines (CI/CD), Git, Bitbucket, Bamboo, Docker, AWS S3, DataDog
Delivery & Tools: Agile/Scrum, SDLC, UAT, Requirements Gathering, Backlog Grooming, Stakeholder Management, Technical Documentation, JIRA, Confluence, Microsoft Excel, AI-assisted workflows

WORK EXPERIENCE

Software Engineer, *TestingXperts (Client: DraftKings)* Oct 2021 – Jul 2024

- Ran the ODR game integration pipeline for DraftKings Casino and Golden Nugget single-handed, building .NET/C# features and shipping via CI/CD pipelines; redesigned the dev-to-QA handoff and replaced manual game file setup with Python automation, scaling integrations from ~150 to 500+ per sprint with fewer errors.
- Restructured and refactored a legacy Django tool used by 1,000+ staff, removing duplicate code and standardising structure and naming; added features and built automated weekly reports for managers up to CEO, saving PMs ~2 hours daily.
- Built backend services in .NET/C# and SQL for payments, bonuses, offers and compliance rules across 7 regulated markets; validated 100+ tables in lower environments and ran UAT on Web, iOS and Android, with zero rollbacks.
- Proposed and built a .NET caching fix for a recurring iOS game-download failure, storing the top-10 most-played games locally; took it from spec and proof of concept to production, cutting download errors by 20%+ as tracked in DataDog.
- Handled 20+ game vendors plus operations and marketing as sole ODR contact across 7 US/Canadian markets, coordinating bug fixes; groomed backlog tickets and wrote user stories and acceptance criteria, with zero escalations in 3 years.
- Documented ODR processes, onboarding notes, release checklists and recurring vendor issues in Confluence, so known problems were fixed in-house, cutting vendor clarification calls by ~50% and saving dev and QA 10+ hours a sprint.

Customer Advisor (Part-Time), *B&Q* May 2025 – Present

- Advise 40+ customers a day, explaining technical products in plain terms and turning vague project ideas into clear requirements; resolve 15+ escalated cases a week from pricing, stock and complaints, working across departments.

KEY PROJECTS

NYC Taxi Operations Analytics

- Built an automated SSIS ETL pipeline loading 2.8M+ NYC taxi trips into a Star Schema warehouse at a 95% load rate, with 9 Tableau dashboards and SSRS reports tracking KPIs across 266 zones to guide driver deployment and revenue planning.

Cross-Industry Churn Prediction with Explainable AI (M.Sc. Dissertation)

- Built and compared six ML models in Python to flag telecom and insurance churn, using SHAP to explain each prediction; identified 64% of insurance customers who left and found vehicle age predicted cancellations better than claims history.

EDUCATION

Dublin Business School, Ireland, M.Sc. Data Analytics, First Class Honours Jan 2025 – Feb 2026

Amity University, India, B.Tech Computer Science and Engineering Jun 2017 – Dec 2021

ACHIEVEMENTS & AWARDS

- **Written Commendation, Senior Engineering Manager, DraftKings:** For independently running the Casino ODR integration and vendor discussions behind the Golden Nugget Online Gaming launch in West Virginia and Michigan.
- **Young Achiever Award (2022) & Action Champion Award (2023), TestingXperts:** Two company-wide awards in under three years; Young Achiever for client feedback, Action Champion for working beyond the defined scope of the role.
