

PROFESSIONAL SUMMARY

Technical Business Analyst with 3 years on DraftKings' real-money casino platforms across 7 regulated US and Canadian markets. Gathered requirements from commercial stakeholders, ran 20+ vendors across US and European time zones, and redesigned handoffs between development and QA, scaling delivery from ~150 to 500+ game integrations per sprint with zero escalations. Promoted twice and earned a written commendation from DraftKings engineering management for the Golden Nugget Online Gaming launch. First Class Honours M.Sc. in Data Analytics. Dublin-based and available immediately.

KEY SKILLS

Business Analysis: Requirements Gathering, Process Mapping, Gap & Root Cause Analysis, UAT, Stakeholder Management, Agile/Scrum, Kanban, Backlog Management, MoSCoW Prioritisation, Business Analysis

Data & Reporting: SQL, Advanced Excel, Power BI (DAX), Tableau, KPI Dashboards & Visual Reporting, Python, R

Tools: JIRA, Confluence, Lucidchart, Figma, Microsoft Excel, Microsoft 365, AI-assisted workflows, Azure DevOps

WORK EXPERIENCE

Customer Advisor (Part-Time), B&Q, Dublin

May 2025 – Present

- Advise 40+ customers a day across paints, home, lighting, flooring and tiling, working out each project's needs (quantities, materials, budget) and matching them to the right products and custom orders; zero order errors to date.
- Translate technical product detail (specifications, measurements, coverage) into plain terms for customers with no trade background.

Technical Business Analyst (Software Engineer), TestingXperts (Client: DraftKings)

Oct 2021 – Jul 2024

- Main contact for 20+ game vendors across 7 regulated markets; gathered requirements (BRDs/FRDs, As-Is/To-Be maps) and built a Confluence knowledge base of recurring issues and workarounds, cutting mid-sprint clarification calls by ~50% and saving 10+ hours per sprint; resolved blockers before sprint close; zero escalations to DraftKings in 3 years.
- Ran the On-Demand Resource (ODR) game integration pipeline solo across DraftKings Casino and Golden Nugget, writing user stories with acceptance criteria and automating the manual data-ingestion process with Python and SQL scripts; scaled throughput from ~150 to 500+ integrations per sprint.
- Identified a recurring game-download failure affecting players, wrote the spec and wireframes for an iOS caching fix (top-10 most-played games stored locally) and built the proof of concept myself; adopted into the roadmap and shipped, with DataDog monitoring confirming a 20%+ drop in download errors.
- Rebuilt a company-wide project and resource tracking tool and automated its weekly reporting, replacing manual spreadsheet updates; adopted by 1,000+ staff up to CEO level, cutting roughly 2 hours of daily manual work per project manager.

KEY PROJECTS

NYC Taxi Operations Analytics

- Analysed 2.8M+ NYC taxi trips to guide driver deployment and revenue planning across 266 zones; built 9 dashboards showing weekday-evening demand peaks, 66% of trips under 15 minutes, and district-level tipping and payment differences.

Cross-Industry Churn Prediction with Explainable AI (M.Sc. Dissertation)

- Built and compared six machine-learning models to flag customers likely to leave telecom and insurance providers, using explainable AI to show stakeholders why each customer was flagged; correctly identified 64% of insurance customers who went on to leave, found that vehicle age predicted cancellations better than claims history.

EDUCATION

Dublin Business School, Ireland, M.Sc. Data Analytics, First Class Honours

Jan 2025 – Feb 2026

Amity University, India, B.Tech Computer Science

Jun 2017 – Dec 2021

ACHIEVEMENTS & AWARDS

- Written Commendation, Senior Engineering Manager, DraftKings:** For independently running the Casino ODR integration and vendor discussions, cited as key to the Golden Nugget Online Gaming launch in West Virginia and Michigan.
- Young Achiever Award (2022) & Action Champion Award (2023), TestingXperts:** Two company-wide awards in under three years; Young Achiever won at Associate grade on the strength of client feedback from DraftKings, Action Champion for consistently working beyond the defined scope of the role.
